

OPSWAT MetaAccess Product Guide

Secure BYOD and Managed Device Access

MetaAccess offers Secure Access to network, data and applications, with advanced compliance checks of end-point devices. This MetaAccess Product Guide provides a logical methodology to customize the solution for specific requirements.

Choose from “Per Device” or “Per Named User” License Model

Per Device

Each unique device under MetaAccess Control

Per device pricing is a good option if you primarily use one device for access to your applications and making it easy for an organization to track usage.

Per Named User

Each unique user under MetaAccess Control

Per named user is a good option if you typically use or share multiple devices in your workplace, such as an engineering lab environment.

Start with the MetaAccess Base Platform

Endpoint Compliance

- | | |
|---|--|
| ✓ Security Application Compliance Check: 3rd Party Anti-Malware, Encryption, etc. | ✓ Native cloud and / or On-Prem deployment (On-Prem requires Pro-Services) |
| ✓ OS Compliance Check: Missing Patches, User Passwords, etc. | ✓ Remediation Page Custom Branding |
| ✓ Assess vulnerabilities and patch thousands of endpoint applications | ✓ Custom Endpoint Check |
| ✓ Removable Media Control - block usage of removal media | ✓ Configurable Endpoint Check Frequency |
| ✓ Detect and remediate Potentially Unwanted Applications (PUA) | ✓ Configurable Agent Auto-update |

Administration and Reporting

- ✓ Data Retention (For Native Cloud)
- ✓ Active Directory Integration
- ✓ Custom Email Report Frequency
- ✓ Configurable Report Triggers
- ✓ User SSO Onboarding
- ✓ User Role Management
- ✓ MetaAccess Cloud Integration API [for Native Cloud]

Choose Optional Modules

Module 1

Advanced Endpoint Protection

- ✓ Advanced Malware Detection - scan endpoint with 20+ Anti-malware engines in the cloud
- ✓ Advanced Removable Media Control - scan for malicious content and sanitize
- ✓ Anti-Key Logger*
- ✓ Screen Capture Protection*

Module 2

Secure Access

- ✓ Cloud application Protection via SAML integration (i.e. Okta, Ping Identity, Other Identity Providers [IdP] support)
- ✓ Software Defined Parameter (SDP) - VPN Replacement
- ✓ Additional Private on-prem SDP Gateways VPN Replacement Gateway

Module 3

Secure Access Cloud Gateways

- ✓ OPSWAT Hosted Cloud VPN/SDP Gateways (SaaS)*

*For use with the Secure Access module only

Support Options

Standard

✓ Included

8AM-5PM / your time zone / 24 hours SLA
